Git, GitHub, Visual Studio Code, Atom, Trello.

RELEVANT COURSEWORK

Software Engineering
HCI, Client-Side Web Development, Mobile App Development, Data Structures.

Visual Communication
Pixel, Vector, Photography, Drawing, Painting, Visual Communication 1 & 2.

PROJECTS

Double-Tap
Mobile App Development
2019

- Developed a multi-player mobile game that was designed to be playable anywhere.
- Planned the design with mock ups in Figma, developed and staged the code using
- React Native, ensured version control with Git, and simulated in Xcode and Android Studio.
Utilized co-working sessions and pair programming to maintain functionality.

Host-It
Software Engineering
2019

- Built a mobile application as an alternative to Facebook events that allows users to plan events among people without Facebook accounts.
- Planned the design in Adobe XD, developed in Cordova and then React-Native, and ensured version control with Git, and simulated in Xcode.
- Implemented optimal user interfaces based on research and feedback conducted among peers.

Two-Headed Calf Design Series
Digital Media 2: Vector
2019

- Created a series of art and promotional media based on a poem.
- Applied visual design practices in Adobe Illustrator to produce a poster, a mobile-app prototype, a pamphlet, and a set of patterned cubes to advertise a star-gazing event.

EXPERIENCE

ITS Technician
Loyola ITS Services
2019 - current

- Troubleshoot with customers to identify problems and navigate resources in order to offer solutions and support in a timely manner
- Execute quality service when assisting customers in order to communicate solutions.
- Document incidents, follow escalation procedure for emergency issues, and contribute to department projects in order to improve the online experiences of users.

President
The Loyola AcaFellas
2019 - current
